INTRODUCTION

This present compilation of doctoral dissertations accepted by American Universities serves two purposes: it is a continuation of Doctoral Dissertation compiled by Trotier and Harman; and it is an index to dissertations abstracted in *Dissertation Abstracts*, volume XVII.

The features and style of the previous volumes sponsored by The Association of Research Libraries have been largely retained, and the statistical tables are comparable.

The following table shows the number of persons who were employed in the various occupations in the United States in 1955 and 1956. The figures are in thousands of persons.

The figures are based on the 1955 and 1956 censuses of the population of the United States.

PUBLICATION, PRESERVATION AND LENDING OF AMERICAN DOCTORAL DISSERTATIONS

Many of the doctoral dissertations written each year are abstracted in *Dissertation Abstracts* and reproduced in full on microfilm by University Microfilms, Inc.

The Association of Research Libraries has endorsed publication by microfilm and the publication of an abstract in *Dissertation Abstracts* as one means of making this material available to scholars and research workers. The institutions participating in this cooperative publication program are to be found in Table I, and are separately listed on the inside front cover.

Graduate schools not requiring the microfilm publication of their doctoral dissertations will usually lend these on interlibrary loan. Inquiries for such dissertations should be addressed to the holding institution through a local reference library.

Dissertations abstracted in *Dissertation Abstracts* may be secured direct from University Microfilms, Inc. either as positive microfilm or as Xerox enlargements on paper. This latter service will be found useful to those who wish to avoid the necessity of using a microfilm reader.

STATISTICAL TABLES

A ten-year comparative tabulation of doctoral dissertations by subject fields is shown in Table II.

Table III gives an analysis by universities and by subjects for the current year. Such tables were compiled also for the preceding volumes in this series. In the American Council on Education's *American universities and colleges*, 3d ed. (p. 54-75) will be found similar tables for the years 1925-35.

In order to avoid misinterpretations, it must be made clear that the lists in this series are not limited to dissertations written for the Ph.D. degree, but that dissertations written for other kinds of doctoral degrees, e.g. in Education, Science, Jurisprudence, Canon Law and Theology, are also included.

SYMBOLS AND ABBREVIATIONS

† Indicates dissertations accepted prior to academic year covered by this volume, but not previously reported.

* Withheld pending publication.
